

REACH CERTIFICATE			
SUBJECT	DATE	PAGE	
DECLARATION OF REGULATORY CONFORMITY TO THE REACH REGULATION (EC) No. 1907/2006	5.24.2016	1 of 1	

Document Uncontrolled If Printed

We, ScentAir, declare, that we are in compliance with our obligations according to the REACH Regulation (EC) No. 1907/2006 and its modifications and updates for the substances contained in the fragrance compound(s)/ingredient(s) listed below.

According to the REACH regulation above mentioned, all the substances previously notified under Directive 67/548/EEC (ELINCS substances) are regarded as notified under REACH and claimed for the corresponding REACH registration number as requested by ECHA. Other substances excluding EINECS and ELINCS in the scope of the REACH legislation have been notified accordingly to their tonnage band.

Products supplied to ScentAir in the EU/EEA are considered to be covered by our fragrance supplier's completed pre-registrations, phase-in on-going registrations and registrations and are therefore regarded as a downstream user. Additionally, to the best of our knowledge, the intended uses (as notified by ScentAir), will be included by our suppliers as part of the registration process in line with the IFRA Guidance REACH Exposure Scenarios for Fragrance Substances_20121211 guidance document which can be found at the following web address: www.ifraorg.org/en-us/guidelines

Any substances out of scope e.g. exempted substances or substances below the threshold for registration under REACH are allowed to be used in products without registration.

The fragrance(s) mentioned below are compliant:
